Post Service — Test Case Specification

Project Name	Redyx
Module Name	Post
File	internal/post/server_test.go
Total Tests	16
Package	post (same-package test)
Created By	idityaGE
Date of Creation	2026-05-10

Test Infrastructure

Component	Implementation
Logger	<code>zap.NewNop()</code>
DB (ShardRouter)	<code>&ShardRouter{}</code> (empty struct — no live DSNs)
Auth Context	<code>auth.WithClaims(context.Background(), &auth.Claims{...})</code>
Helper convention	<code>t.Helper()</code> in <code>testPostServer</code>
Nil tolerance	Tests short-circuit before any DB/shard access

1. HotScore / RisingScore Ranking Algorithm Tests

Test Case ID	Test Name	Pre-Condition	Test Steps	Test Data	Expected Result	Status
TC_POST_001	TestHotScore_ — NewPost_HighScore		Call <code>HotScore(10, time.Now())</code>	votes = 10, postedAt = now	Returned score > 0	PASS
TC_POST_002	TestHotScore_ — OlderPost_LowerScore		Compute <code>HotScore</code> for same vote count at two different times; compare	votes = 10, recent vs 24h old	Recent post score > old post score	PASS
TC_POST_003	TestHotScore_ — ZeroScore_StillPositive		Call <code>HotScore(0, time.Now())</code>	votes = 0, postedAt = now	Returned score > 0 (age-based floor prevents zero)	PASS

Test Case ID	Test Name	Pre-Condition	Test Steps	Test Data	Expected Result	Status
TC_POST_004	TestRisingScore — PositiveVotes		Call RisingScore(100, time.Now().Add(-1h))	votes = 100, postedAt = 1h ago	Returned score > 0	PASS
TC_POST_005	TestRisingScore — ZeroVotes		Call RisingScore(0, time.Now())	votes = 0	Returned score = 0	PASS

2. CreatePost Validation Tests

Test Case ID	Test Name	Pre-Condition	Test Steps	Test Data	Expected Result	Status
TC_POST_006	TestCreatePost_Unauthenticated	Post server initialized	Call CreatePost with unauthenticated context.Background()	title = "Valid Title", community = "testcomm"	Returns an error (missing auth claims)	PASS
TC_POST_007	TestCreatePost_EmptyTitle	Authenticated context	Call CreatePost with empty title	title = "", community = "testcomm"	Returns an error	PASS
TC_POST_008	TestCreatePost_TitleTooLong	Authenticated context	Call CreatePost with 301-character title	title = 301×"a"	Returns an error (max 300 chars)	PASS
TC_POST_009	TestCreatePost_EmptyCommunityName	Authenticated context	Call CreatePost with empty community_name	title = "Valid Title", community = ""	Returns an error	PASS
TC_POST_010	TestCreatePost_LinkType_MissingURL	Authenticated context	Call CreatePost with POST_TYPE_LINK but empty URL	postType = LINK, url = ""	Returns an error	PASS
TC_POST_011	TestCreatePost_LinkType_InvalidURL	Authenticated context	Call CreatePost with POST_TYPE_LINK and malformed URL	postType = LINK, url = "not a valid url"	Returns an error	PASS
TC_POST_012	TestCreatePost_MediaType_NoMediaIDs	Authenticated context	Call CreatePost with POST_TYPE_MEDIA and nil media_ids	postType = MEDIA, mediaIds = nil	Returns an error	PASS
TC_POST_013	TestCreatePost_TextBody_TooLong	Authenticated context	Call CreatePost with text body of 40001 chars	body = 40001×"x"	Returns an error (max 40 000 chars)	PASS

3. GetPost Validation Tests

Test Case ID	Test Name	Pre-Condition	Test Steps	Test Data	Expected Result	Status
TC_POST_014	TestGetPost_EmptyPostID	Post server initialized	Call GetPost with empty post_id	postId = ""	Returns an error	PASS

4. UpdatePost Validation Tests

Test Case ID	Test Name	Pre-Condition	Test Steps	Test Data	Expected Result	Status
TC_POST_015	TestUpdatePost_Unauthenticated	Post server initialized	Call UpdatePost with unauthenticated context	postId = "post-123", title = "New Title"	Returns an error	PASS
TC_POST_016	TestUpdatePost_EmptyPostID	Authenticated context	Call UpdatePost with empty post_id	postId = "", title = "New Title"	Returns an error	PASS
TC_POST_017	TestUpdatePost_TitleTooLong	Authenticated context	Call UpdatePost with 301-character title	title = 301×"a"	Returns an error (max 300 chars)	PASS

5. DeletePost Validation Tests

Test Case ID	Test Name	Pre-Condition	Test Steps	Test Data	Expected Result	Status
TC_POST_018	TestDeletePost_Unauthenticated	Post server initialized	Call DeletePost with unauthenticated context	postId = "post-123"	Returns an error	PASS
TC_POST_019	TestDeletePost_EmptyPostID	Authenticated context	Call DeletePost with empty post_id	postId = ""	Returns an error	PASS

6. ListPosts Validation Tests

Test Case		Pre-	Test Steps	Test Data	Expected Result	Status
ID	Test Name	Condition				
TC_ POST_ 020	TestListPosts_ EmptyCommuni- tyName	Post server initialized	Call ListPosts with empty community_name	community = ""	Returns an error	PASS

Patterns & Conventions

Pattern	Implementation
Package scope	package post (white-box / same-package)
Logger	zap.NewNop() (silent)
ShardRouter stub	&ShardRouter{} — bypasses NewShardRouter which needs live DSNs
Nil DB tolerance	Validation logic short-circuits before shard/DB access
Auth context	auth.WithClaims(context.Background(), &auth.Claims{UserID, Username})
Helper tagging	t.Helper() in testPostServer and authenticatedCtx
